THE SENSE *of place*

Herzog & de Meuron, the visionary architects behind Riviera Residences, are renowned for their distinctive approach to architecture, deeply rooted in the history, culture, and identity of each location. Their philosophy of creating a profound sense of place finds expression in Riviera Residences, inspired by Abu Dhabi's rich pearl-diving heritage.

Once the foundation of the Emirates' prosperity, this timeless tradition is reinterpreted through shimmering mother-of-pearl façades that reflect the beauty of the sea and honour the courage of the region's pearl divers, connecting contemporary architecture with the cultural heritage of Abu Dhabi.

BEYOND ARCHITECTURE *a vision* FOR THE FUTURE

Herzog & de Meuron envisioned Riviera Residences as a waterfront resort where architecture, landscape and water come together in dialogue with the city. A place that embraces the energy of Abu Dhabi while creating a world of privacy, tranquillity and resort living.

This philosophy shapes every aspect of the development. From private residences and secluded gardens to waterfront retreats and vibrant social spaces, each element is connected through a carefully considered balance of openness and intimacy, nature and urban life.

CASCADING ARCHITECTURAL *forms*

A unique architectural composition defined by cascading villas and the expressive sculptural forms of the façades. The interplay of volumes and stepped silhouettes creates a distinctive architectural identity, reflecting Herzog & de Meuron's visionary approach to design.

A *masterpiece* TAKES SHAPE IN ABU DHABI

The visionary thinking, creative genius and pioneering spirit of Herzog & de Meuron come together in Riviera Residences — a remarkable waterfront development set to become one of Abu Dhabi's most distinctive landmarks.
